Art Unit: 1742

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 174 and 176-227 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 20-53 of U.S. Patent No. 6,165,247. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are drawn to processes of making alloy, composite, or coated particles comprising nickel, whereas the '247 claims are to processes of making particles comprising platinum (with or without other metal or oxide phases). However, note that the process claimed in the '247 patent may result in particles comprising nickel; see '247 claim 49. Note further that the process of the instant claims may result in particles comprising platinum; see instant claim 206. Finally, note that many of the dependent claims in the present application define limitations substantially the same as those of the '247 patent; compare instant claims 180-183 with '247 claims 24-27, instant claims 195 and 196 to '247 claims 41 and 42, or instant claims 211 *et seq* to '247 claim 53. Given that the actual process steps are the same in both the presently claimed process and that of the '247 claims, no patentable distinction is seen between the two sets of claims.
3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1742

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. The Amendment filed July 30, 2004 overcomes the rejections made in the previous Office Action based upon the Kodas et al. patent. In the July 30 response, Applicant indicates that upon the indication of otherwise allowable subject matter, Applicants will submit an appropriate Terminal Disclaimer. The examiner submits that a properly filed Disclaimer would overcome the obviousness-type double patenting rejection based upon the '247 patent.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
